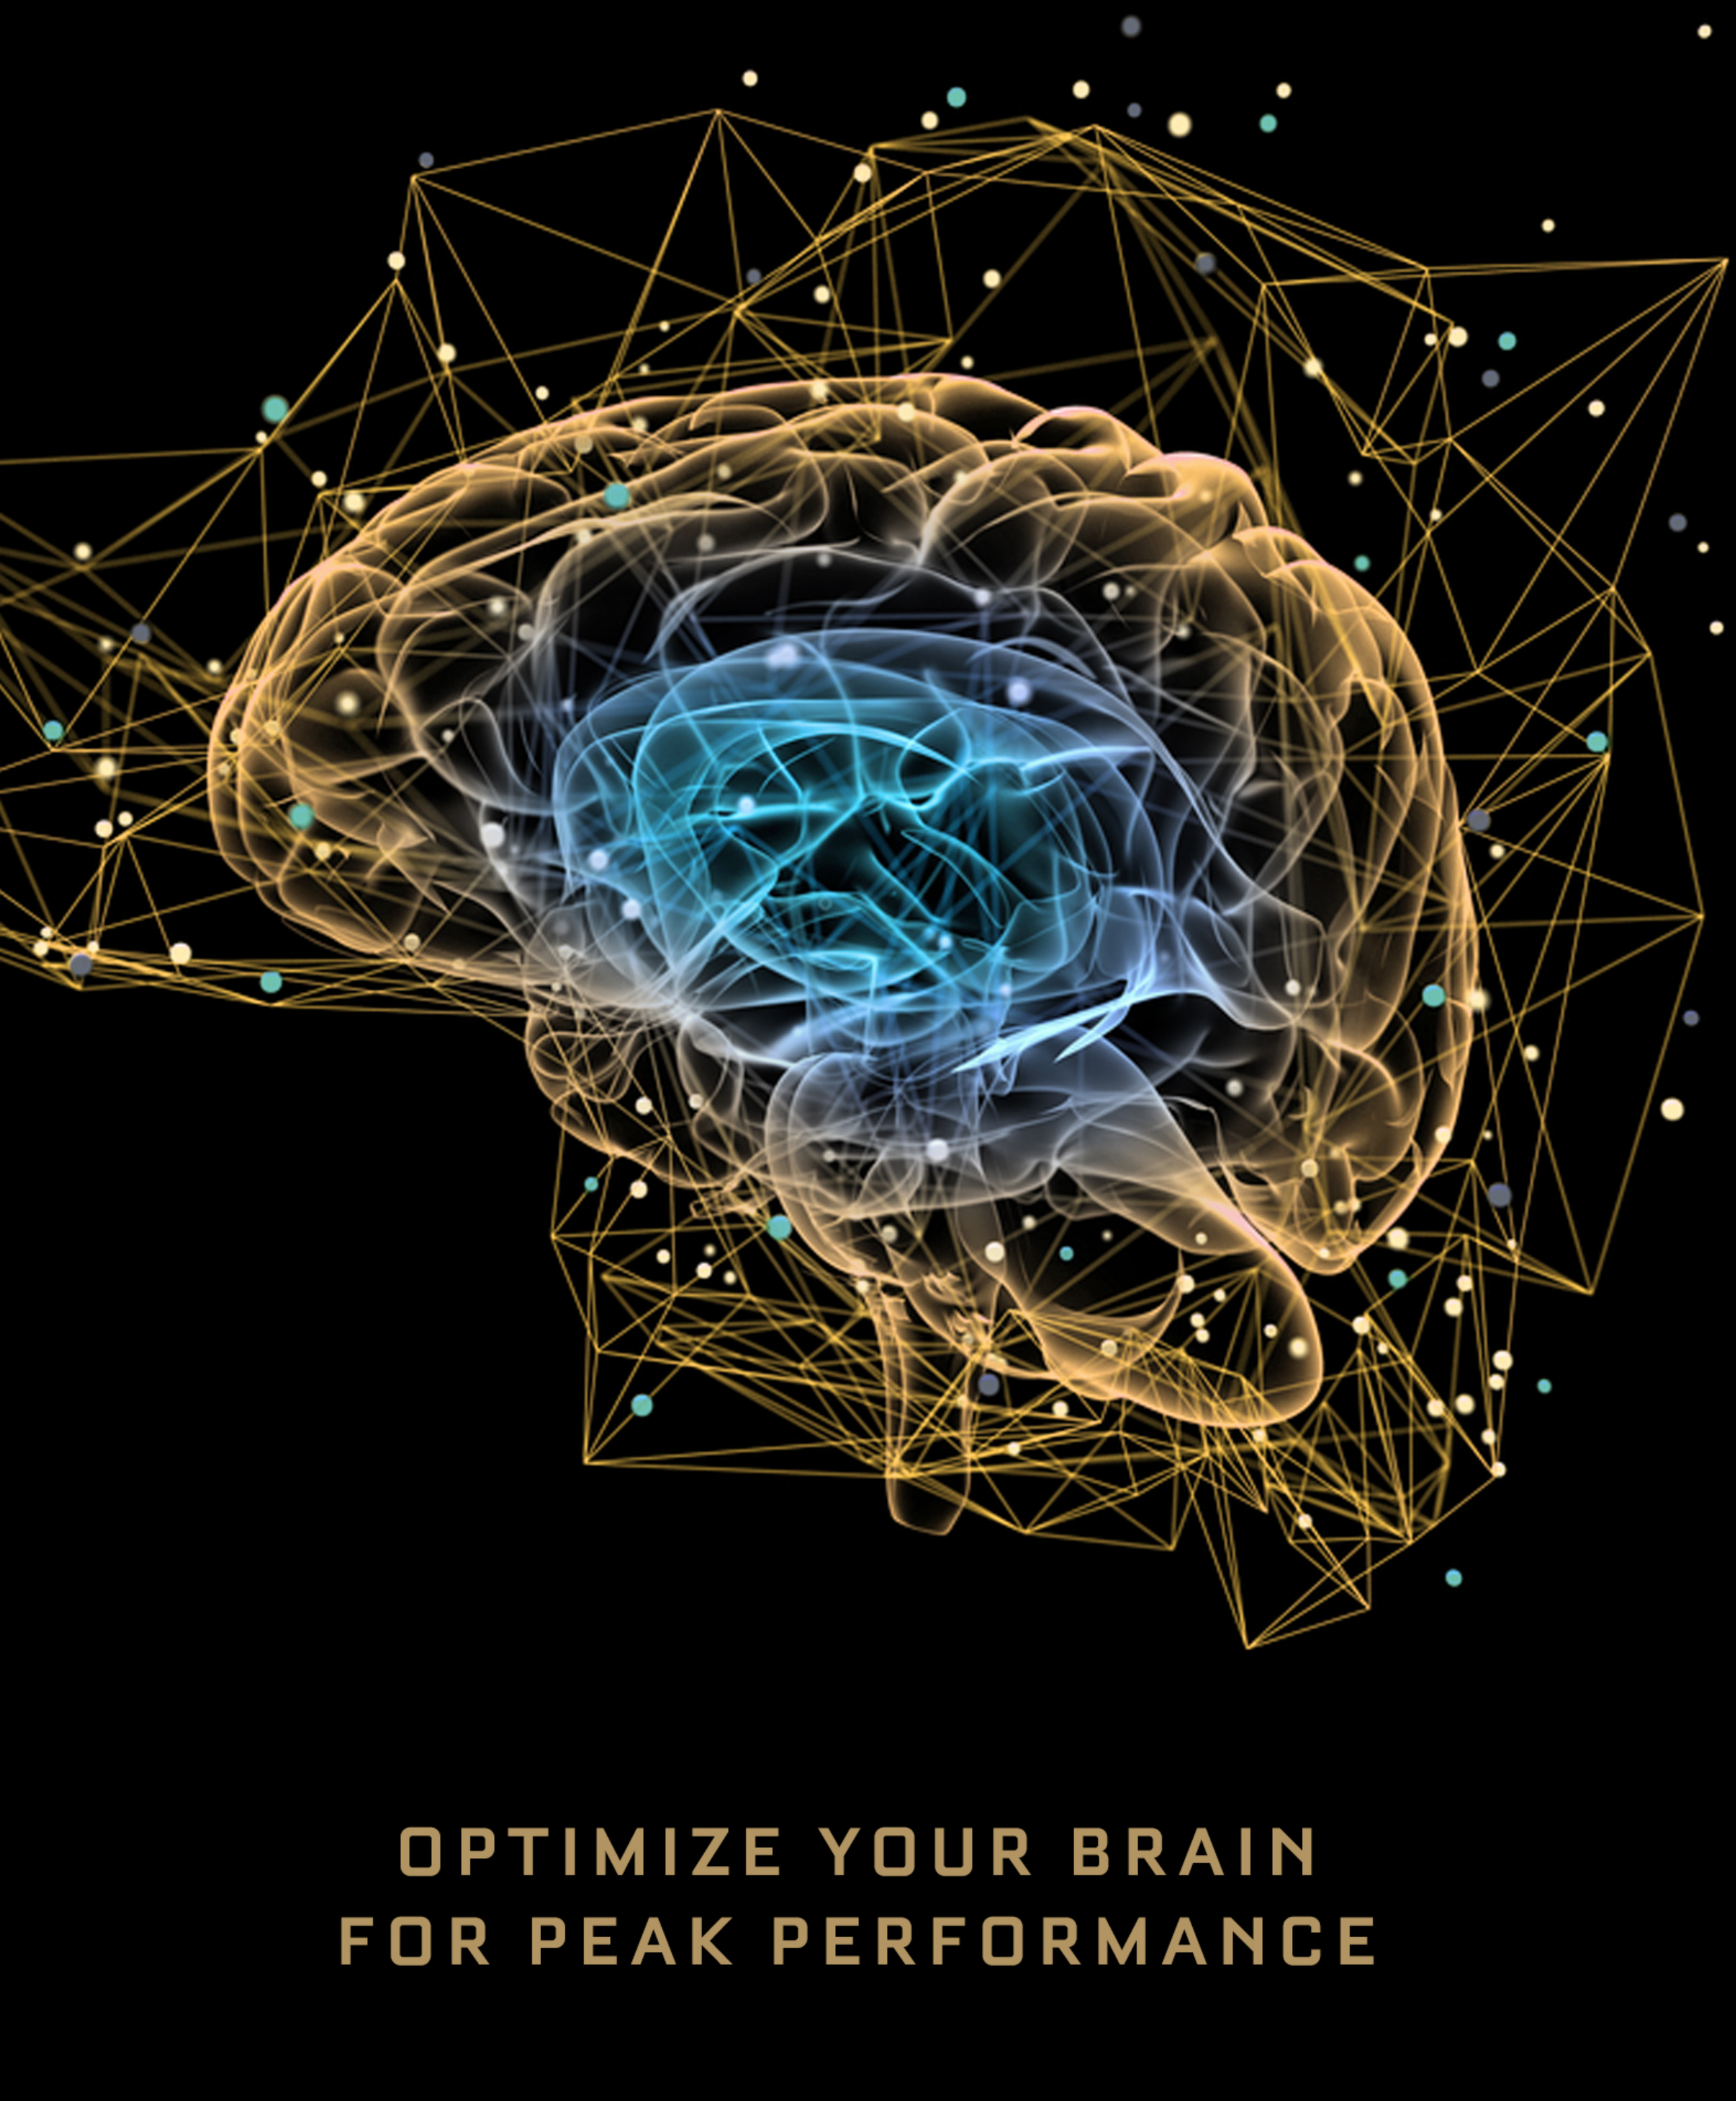
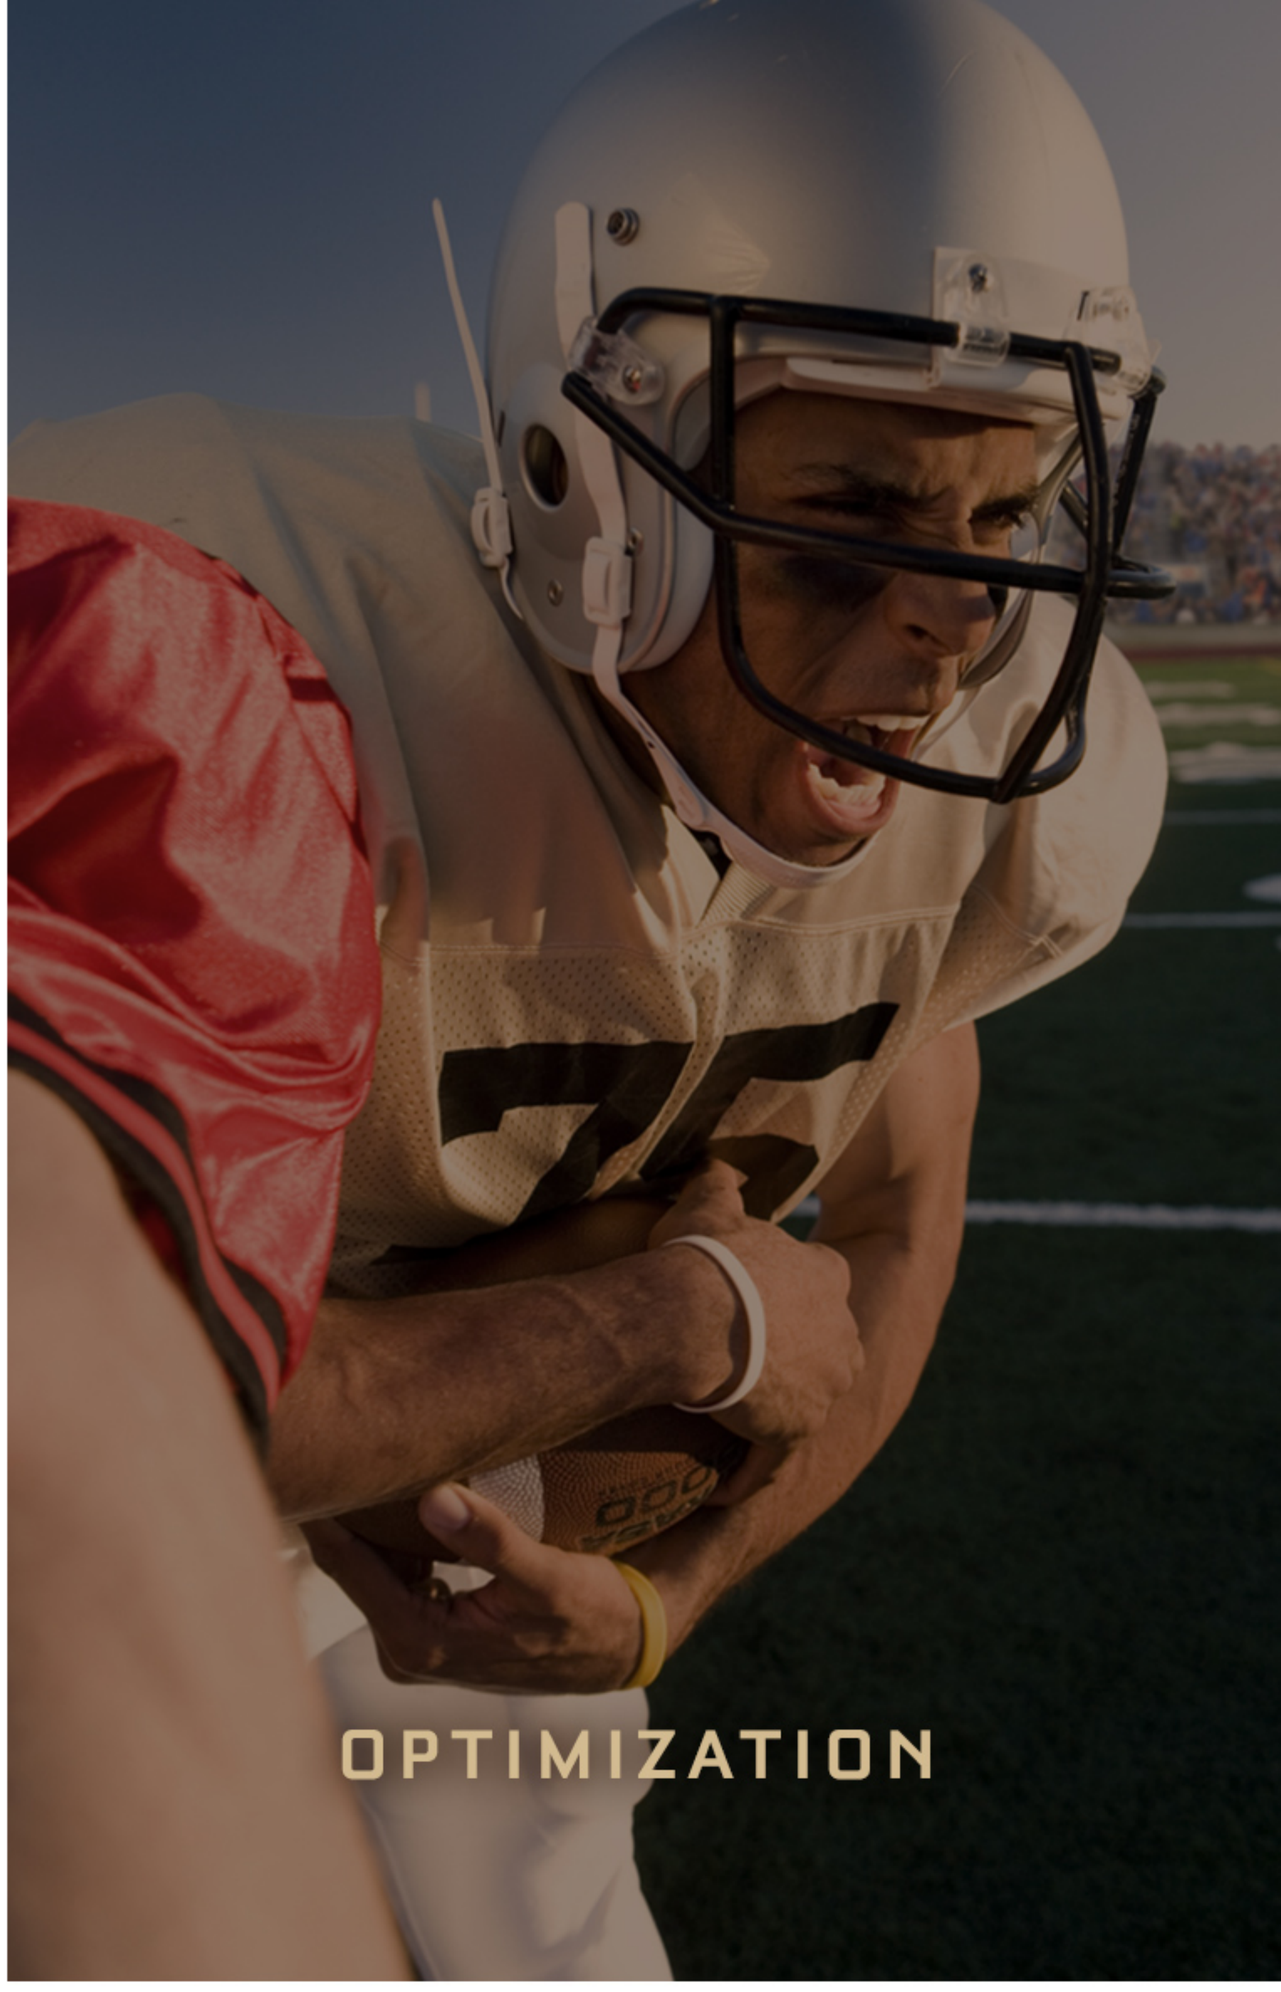
NEUROLOGICS

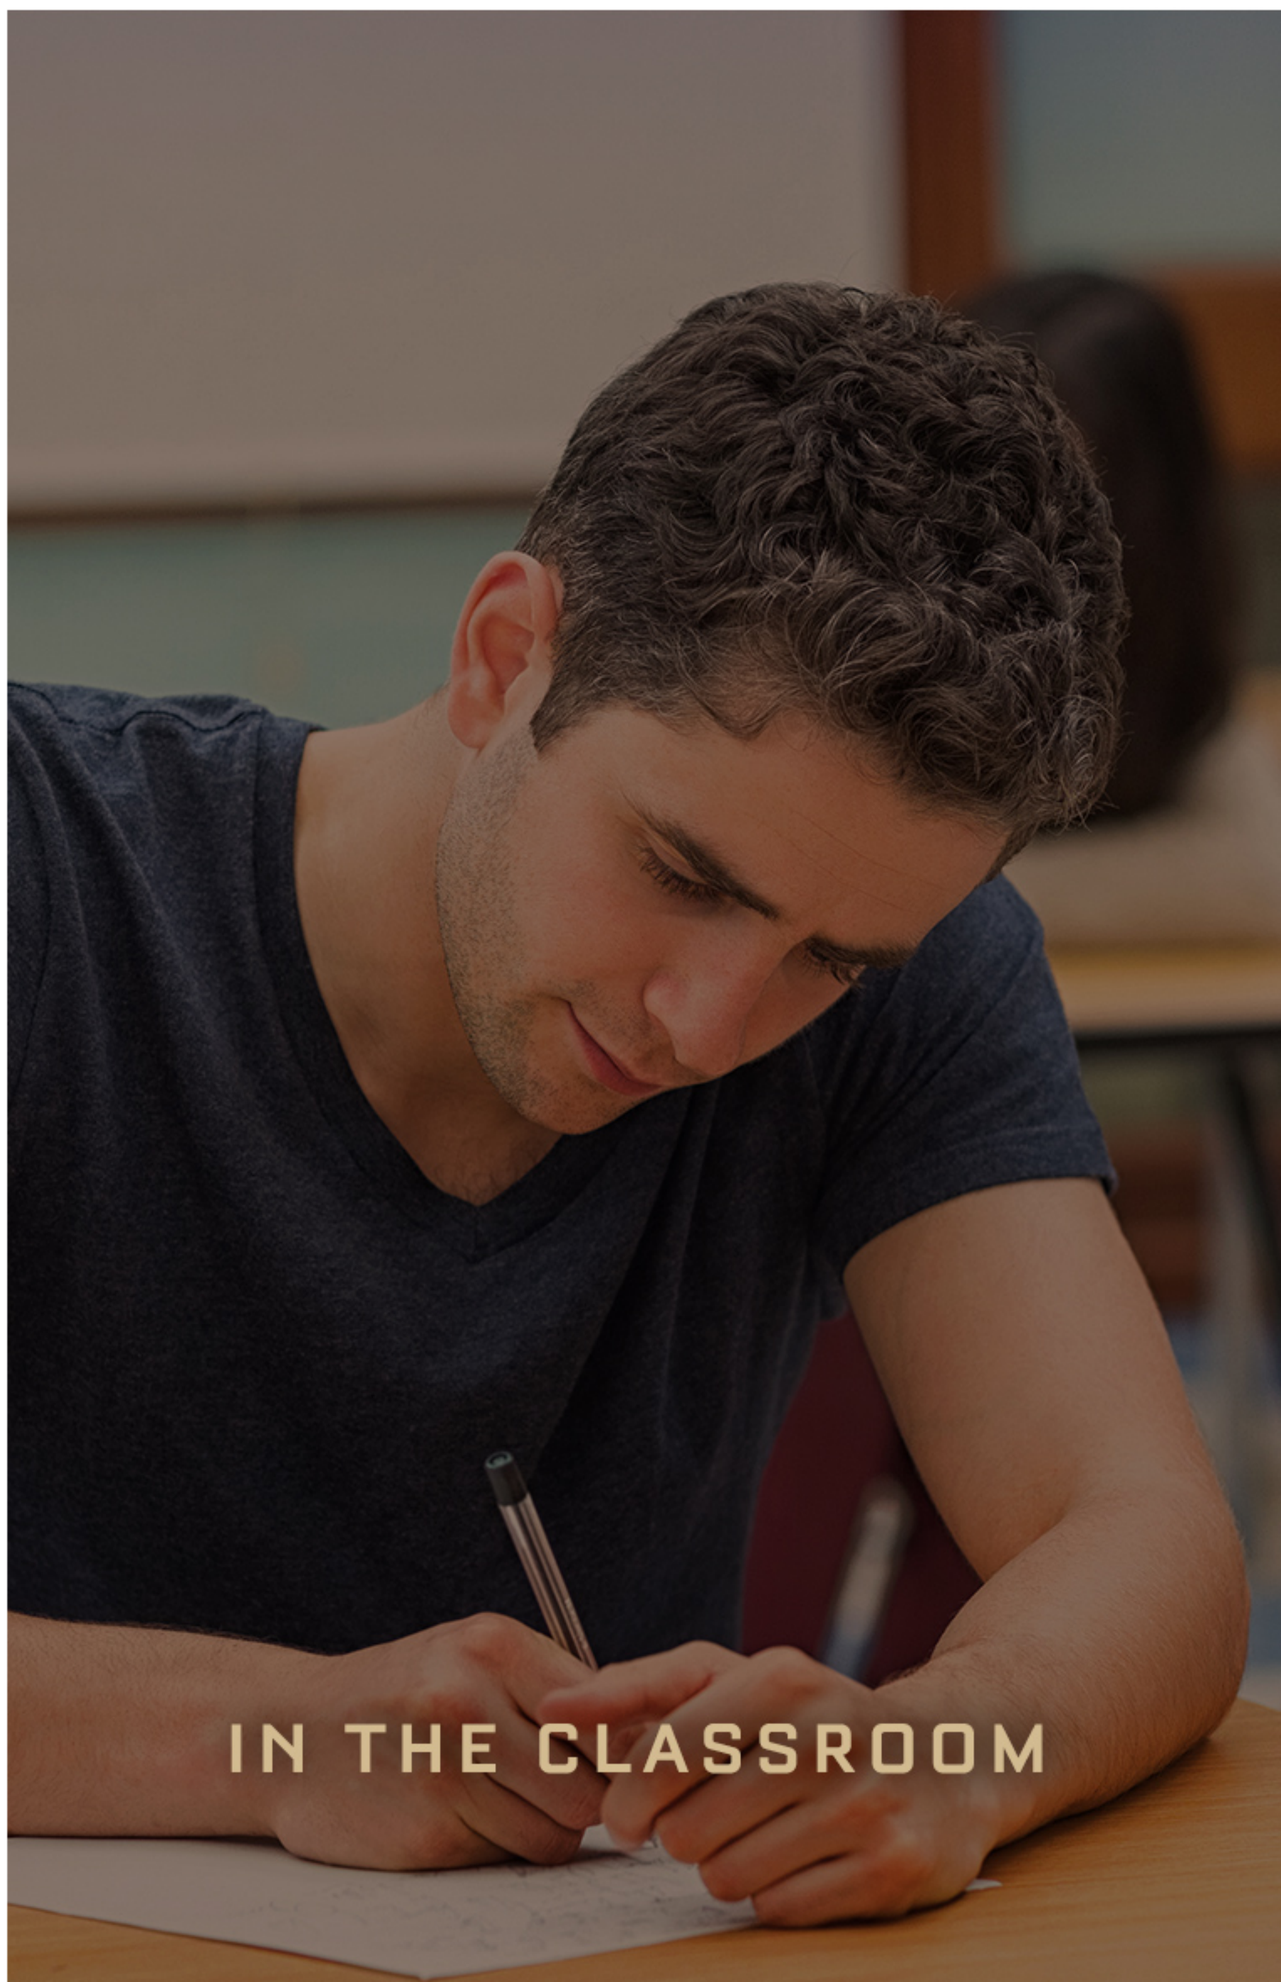


OPTIMIZE YOUR BRAIN
FOR PEAK PERFORMANCE



MAXIMIZE YOUR POTENTIAL

Accurate Assessment + Neurologics Neuroengineering® = Improved Performance



THOUSANDS OF SUCCESS STORIES:

NEUROLOGICS® NEUROENGINEERING®

helps individual athletes to optimize their brains for peak performance. And it helps teams to manage risk and develop their players.

"Once I knew what it felt like to have a highly functional brain, I didn't want to go back to the way I felt before."
J.Z.

"I wanted to know. After at least 10 concussions, I wanted to understand how that affected my function."
H.D.

PHASE ONE:

ACCURATE ASSESSMENT

Precise brain mapping gives an accurate assessment.

Individual Report of Findings contains a custom neuroengineering program designed for the specific needs of each athlete.

Electroencephalogram (EEG) technology has been around for almost a century, but technological limitations prevented scientists from using EEG data to create practical applications for humans. Neurologics brings EEG into the 21st century with cutting-edge qEEG: Quantitative Electroencephalogram combines traditional EEG with proprietary software that creates a precise assessment, with unmatched accuracy.

Neurologics analyzes signals from two hundred and ninety-three activities in the brain using best-in-class software. Individual results are compared with multiple data sets compiled by renowned research institutions such as the National Institutes of Health (NIH) and New York University. Test results form the basis of the Individual Report of Findings.

A total brain health assessment, with results that show up on the field and in the classroom.

Please Note: Brain mapping and optimization can take place in the off-season.

PHASE TWO:

TARGETED NEUROENGINEERING

Neurotraining at home, office, or on the road.

Ongoing evaluation and refinement ensures neurotraining plans keep pace with the improving brain.

Neurologics Individual Report of Findings empowers clients to begin a customized qEEG optimization plan designed by an experienced team of neurologists, computer engineers, and behavioral scientists. Expert clinicians guide a series of sessions that pair specific brain-training exercises with real-time qEEG analysis. Cognitive tasks are performed from the comfort of home, office, dorm, or hotel room while measuring brain activity.

Neurologics Neuroengineering® unleashes radical improvements in brain performance. Data from these sessions is used to refine and perfect training exercises over time. A client's personalized optimization plan evolves through the optimization process. The brain learns, grows, and reaches an optimal level of performance that can transform a client's life.

NEUROLOGICS

Caring for players. Saving the game.®

Give your team *The Neurologics Edge™*.

855.814.4983 | INFO@NEUROLOGICS.COM

Neurologics uses FDA-approved technology and offers custom-designed, drug free, neuroengineering solutions preferred by Olympians, high-powered collegiate and professional athletes. Selected by MIT as a top innovator in behavioral neuroscience.
